Oversees inspection and mark-out duties for all District activities.

Performs other duties as assigned.

QUALIFICATIONS GUIDELINES

Knowledge of: Supervisory principles and practices; civil engineering principles, practices and techniques with particular emphasis on the planning, design, construction and operation of water supply and wastewater collection, reclamation systems and facilities; principles and practices of project management; principles and practices of contract development, negotiation and administration; federal, state and local laws and regulations pertaining to domestic water supplies and wastewater reclamation; using computer and related software applications; administrative principles and methods, including goal setting, program and budget development and implementation; and, employee relations.

Ability to: Plan, organize, administer and coordinate a variety of routine engineering programs and services; plan, organize, assign, motivate, direct, review and evaluate the work of assigned staff, and provide for their training and professional development; develop and implement goals, objectives, policies, procedures, work standards and internal controls; analyze complex technical and administrative engineering problems, evaluate alternative solutions and adopt effective courses of action; direct, review and evaluate the work of consultants and contractors; prepare clear and concise reports, correspondence and other written materials; exercise sound independent judgment within general policy guidelines; communicate clearly and concisely, both orally and in writing, and be understood while using the District's radio communication system; use a computer and related software applications; and, establish and maintain effective working relationships with other employees and those contacted in the course of the work.

EDUCATION, EXPERIENCE, LICENSES AND CERTIFICATIONS

Education: Equivalent to an Associate's degree from an accredited college or university in Drafting, Civil Engineering, CADD, GIS, Water Technology, and/or a related field with additional training or course work in scheduling, construction/project management, contract management, project cost estimating, and accounting are desirable.

Experience: A minimum of two years of experience in a senior level Engineering position, related to design, construction, and maintenance of water, wastewater, water reclamation or public works projects, or its equivalent; or and equivalent combination of education and experience sufficient to successfully perform the essential duties of the job such as those listed above.

License and Certifications: California Class C Driver's License

PHYSICAL DEMANDS AND WORK ENVIRONMENT

The physical demands and work environment described here are representative of those that must be met by an incumbent to successfully perform the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

Physical Demands: While performing the duties of this job, incumbents are occasionally required to stand, sit, talk; hear; walk; use hands to finger, handle, feel or operate objects, tools, or controls; and reach with hands and arms. Hand-eye coordination is necessary to operate drafting instruments, computers and various pieces of office equipment. Incumbents are occasionally required to climb, balance, stoop, kneel, crouch, crawl, and smell. Incumbents must occasionally lift and/or move up to 25 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception, and the ability to adjust focus.

Work Environment: Work is performed mostly in office settings. Some outdoor work is required in the inspection of various developments, construction sites, or facilities. While performing the duties of this job, incumbents occasionally work in outside weather conditions. Incumbents occasionally work near moving mechanical parts, heavy construction equipment and in high, precarious places and are occasionally exposed to wet and/or humid conditions, fumes or airborne particles, and vibration. The noise level is usually quiet to moderate.
